**Subject:** RE: Bath data

Hi Rob,

Based on internal discussions with EPA's technical team and a recommendation from the CSTAG memo, dated April 25, 2018, EPA Region 2 is requesting the CPG to collect an additional round of bathymetry data from the upper 9 miles. The CPG should prepare an amendment to the May 2010, Quality Assurance Project Plan for Lower Passaic River Restoration Project: Periodic Bathymetric Surveys to specify which approach will be used to capture more complete bathymetric coverage in the shallow areas. The approach should be robust enough to compute bathymetric changes when compared with any subsequent surveys.

Please keep in mind that EPA will most likely perform oversight of the instrument calibration as well as data collection activities. This request is in accordance with the with Section IX, Paragraphs 39 (b) and (e) and Section XI, Paragraph 53 (b) of the RI/FS Agreement.
